VERTIGA HYBRID

The only vertical designer heater for extremely low water temperatures

Vertiga is the perfect combination of the 3 most important Jaga characteristics: power, energy-efficiency and design. Jaga Vertiga is a completely new kind of heating unit, equipped with two dynamic coils, and is compatible with all heat sources. Moreover, it's specially designed for heat pumps and low temperature boilers. Both coils, made from copper and aluminum, ensure a lateral air flow and are able to generate high power levels at low water temperatures.

Vertiga is also suitable for non-condensing cooling in combination with any heat pump that has a cooling function. This mild form of cooling is very energy-efficient.

cooling

VERTIGA HYBRID

THE TOP PERFORMER FACTOR

Brand new Dynamic vertical radiator system for high output even at low water temperatures

Easy to install fully pre-assembled cassette

Whisper-quiet boosters

Sound insulation for a whisper-quiet operation

2 Corrosion-free heat exchangers in copper/aluminium

Pre-perforated openings for electrical cabling

12V power supply and automatic control

Whisper-quiet boosters

Pencil-proof air intake at the top and bottom

Traditional MM connection (central bottom end)

Hidden vertical design grilles distribute the warm air all around the room

UNIQUE DESIGN PERFORMANCE

Perfect warm-up of the room through horizontal heat distribution across the complete height of the radiator

9x faster warm-up

Very high power even at super-low water temperatures

10 to 30% energy savings compared with under floor heating or heavy steel radiators

Fully automatic operation driven by water temperature sensors

OUTPUT BASED ON WATER TEMPERATURE

Comparing Vertiga and a traditional vertical radiator of the same size
Sound pressure Vertiga max. 28 db(A) (in medium mode).

HEATING OR HEATING + LIGHT COOLING®: THE IDEAL HEAT PUMP HEATER

HIGH OUTPUT WITH ALL WATER TEMPERATURES, HOT AND COLD

New, environmentally-friendly installations require much better thermal units. This ensures a comfortable temperature at a low water temperature and a refreshing coolness with non-condensing cooling. Jaga Hybrid heating units are equipped with the brand new DBH system, DB stands for Dynamic Boost, to considerably increase the power of the heater. The H of Hybrid stands for the dual effect: heating and cooling.

- Perfectly controlled heating at the lowest water temperature thanks to the hybrid system's reaction speed.
- By default, suitable for energy-efficient non-condensing cooling in combination with any heat pump.

MOST RESPONSIVE OUTPUT SYSTEM CRUCIAL FOR HEATING AND COOLING DOWN

Heating

Is the oven or dishwasher on? If the sun shines inside? Your home is a dynamic given with constantly changing temperature conditions and comfort requirements. A quickly reacting heater such as Strada Hybrid anticipates this and accurately controls the temperature in all circumstances..

Jaga Light cooling®

The reaction capacity is also crucial for non-condensing cooling. In order to prevent moisture problems, central condensation monitoring must be provided. This can only work efficiently with a very fast-acting delivery system, which immediately adjusts the cooling system in case of a sudden rise in humidity.

More than ever, the responsiveness determines your energy consumption and your comfort.

COMPARISON OF THE REACTION TIME IN CASE OF TEMPERATURE CHANGES

VERW 200 041 08 XXX XX
 3-speed control (HA)
 or BMS (HB)

DELIVERY

- front panel can be clicked in easily
- fully pre-assembled wall cassette with vertical grilles for air outlet at the left and right side
- pencil-proof grille for air inlet at the bottom and top end
- pre-perforated openings for electrical connection
- central connection MM (MM Bottom or Top)
- mounted 3-speed control

COLOURS

Primo

Environmentally friendly, scratch-resistant, high UV resistant powder coating.

Standard colours:

- traffic white RAL 9016 (133), soft touch lightly structured satin lacquer
- sandblast grey (001), fine texture metallic
- off-black RAL 7021 (145) Soft touch: finely-textured matte look, gloss degree < 10%

Other colours: see colour chart.

Only available in soft touch (code 1..), smooth satin (code 3..) and special colours.

Not available in smooth glossy (code 2..).

HYDRAULIC CONNECTION

Standard connection:
 central connection MM below or on top, flow left or right.
 Top connection:
 the radiator is symmetrical and can be mounted either way up.
 Provide an air vent on the central heating pipework above the radiator.

CONNECTION SETS HEATING

Connection set to the wall with a Deco-Pro valve

TRV head and sleeve couplings included.

	RPE/ALU tube 16/2	316	
	RPE/ALU tube 18/2	318	

Other connection sets and sleeve couplings

See chapter "Connection sets and valves" for all connection options and technical information

ELECTRIC CONNECTION

Equipped with pre-perforated openings and 230 VAC clamp connector.

3-SPEED CONTROL (HA)

User friendly operation with three power positions and LED indication, mounted on the side of the Vertiga. Vertiga Hybrid switches fully automatically between heating and light cooling.

BMS - HOME AUTOMATION / BUILDING MANAGEMENT SYSTEM (HB)

With 0-10V analog input.
 Without control panel: the speed of the boosters is determined by the control signal.
 Automatic heating / cooling changeover is possible.
