

Built on a Mercedes Actros platform, and designed by [Arne Quinze](#) the truck looks somewhat like a milk truck that's massive light fixture. Inside, a VIP lounge with white leather furnishings by [Moroso](#), a projections room, kitchen and your comfort. Quinze designs furniture for Moroso in addition to designing under his own label. He's known for exa collection, Primary Pout, of 1999 that still sells more than 15,000 pieces annually.

Through the Experience Truck's 182 windows, the magic of the multicolor LED lighting system (of one mile of LED changing collage. A Dolby surround sound system inside and 4000 Watts of Bose sound power outside guarantee an experience, too. To find out what goes on inside the truck, you just need to leave your computer screen and go moment) and have a Jaga Experience. [By Tuija Selpel](#)
